From Kansai Airport: Take the Kansai-Airport Rapid Service for Kyobashi and get off at Osaka Station

OSAKA CITY UNIVERSITY
2020

Message from the President

Osaka City University is one of the largest public universities in Japan, and the only multidisciplinary university in Osaka City. It is also the first city university in Japan, tracing its beginnings to the Osaka Commercial Training Institute founded in 1880. This institute was founded thanks to the leadership of Tomoatsu Godai, a cosmopolitan samurai who lived by the motto of "tari" (the idea of giving priority to others), and who was said to be the founding father of the modern economy of Osaka, responsible for modernizing the city.

To mark the opening of our predecessor, the Osaka Commercial Training Institute, Dr. Hajime Seki, the mayor of Osaka at the time, made a quote, saying that as a university with the goal of fostering academia in the background of the city of Osaka, "This institution should not be an imitation of Japan's national universities." These words have been carried on from one generation to the next as the spirit of establishing our university.

This spirit has given our university a freehearted character, and it has produced many great alumni. Among them are Distinguished Professor Yoichiro Nambu, who established the theoretical physics group at our university and won the Nobel Prize in Physics in 2008 for the discovery of the theory of spontaneous broken symmetry, which is the basis for elementary particle physics. He was followed by Dr. Shinya Yamanaka, Director of the Center for iPS Cell Research and Application, Kyoto University, who earned his PhD from Osaka City University, and won the Nobel Prize in Physiology or Medicine in 2012 for his research on iPS cells (induced pluripotent stem cells). In the business world as well, many founders of major companies and representatives of stock market listed companies, as well as internationally active alumni have graduated from our university.

What does society need? Talented people who can clearly indicate what they will study, what they can do, and what they want to do at university. The significance of enrolling in university is to find and decide your purpose in life. At our university, we focus on education to achieve this. We consider worldliness and communication to be two important skills, and so have arranged programs including not only liberal arts and specialized education, as well as the science of Osaka's famous "comedy" culture, international business practice, and global practical economist development. We also actively promote overseas exchanges and support extracurricular activities.

Nothing would make me happier than for everyone who studies at this university to enjoy deeper communication with good teachers and friends as they get a running start towards the goals in life they have found here, all in this liberal academic environment cultivated by our traditions. My slogan for the university is to be "a local base of knowledge, health, and smiling faces." Let us follow that slogan, and grow together at a university we can be even more proud of, where we turn dreams into reality.

Tetsuo Arakawa

TETSUO ARAKAWA
President, Osaka City University

History

“The university is here for the city, and the city is here for the university.”

1880 Establishment of the Osaka Commercial Training Institute

Founded by Tomoatsu Godai, the father of the modern economy of Osaka, as the second school of business law in Japan after Tokyo.

1928 Founding of Osaka University of Commerce, the first city university in Japan

Hajime Seki, the Mayor of Osaka at the time, made the motto "The university is here for the city, and the city is here for the university," and so the first city university in Japan was established with strong expectations of the residents of Osaka.

Nobel Prizes

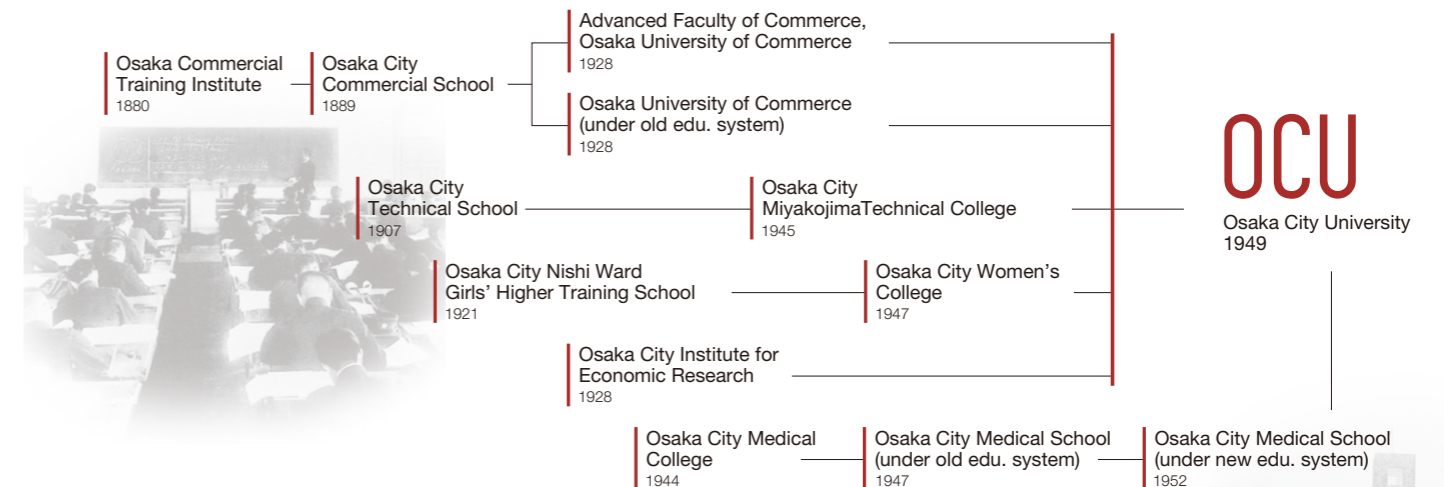

Dr. Yoichiro Nambu (1921-2015) (Distinguished Professor Emeritus)

Nobel Prize in Physics in 2008 for the discovery of the mechanism of spontaneous broken symmetry in subatomic physics.

Dr. Shinya Yamanaka (1993 OCU Graduate School of Medicine alumnus)

Nobel Prize in Medicine in 2012 for the discovery that mature cells can be reprogrammed to become pluripotent.

1889 Traditional boat races

This tradition started as a "water sports competition" when there were not any schools holding boat races. It has become a famous event in Osaka, beloved by the residents.

1949 Launch of Osaka City University, a new incarnation

Based on the system for new universities, Osaka City University was launched as the only public university on a scale befitting multidisciplinary universities. The first president was Kyo Tsuneto.

Why Study at OCU?

Founder's Noble Spirit Fused with Mercantile Rationalism

One of our inspirational founders was Tomoatsu Godai, a former samurai who understood the importance of industrialization. He studied in Britain before the Meiji Revolution in 1868, a landmark of Japanese modernization, and greatly contributed to the development of modern Osaka, a city of commerce, industry, culture and innovation. Godai's core belief was to think of others before thinking of oneself.

Good for Everyone (*Sanpo-yoshi*) Social Conscience of Osaka Citizens

Godai was enthusiastically supported by the people of Osaka. Why? Because his attitude was perfectly aligned with the merchants' belief in *sanpo-yoshi*, which means "benefit for all three sides": vendors, customers and society in general.

OCU Innovators

OCU adopts Godai's spirit in its disciplines. In research as well as in education, we foster modern samurai and encourage them to venture out in various intellectual fields, always thinking of others.

Osaka: International City for Two Millenniums

Osaka has been a social, commercial and cultural center of Japan for almost 2000 years. The city has also been a hub of international exchange. Osaka's cultural diversity distinguishes it from other large megalopolises in Japan, and the people are friendly, the food is excellent and life is exciting.

Advanced Research Activities

Center of Education and Research for Disaster Management (CERD)

<https://www.cerd.osaka-cu.ac.jp/>

Immediately after the Great East Japan Earthquake, OCU launched a cross-sectional research study on ways to support the affected areas and anticipate future disasters. CERD was established in 2015 to further promote these activities, focusing on the themes of “social implementation of disaster knowledge” and “disaster-resilient communities” in close cooperation with local residents and government agencies.

Center for Health Science Innovation (CHSI)

<http://www.chsi.osaka-cu.ac.jp/en/>

CHSI was established in 2013, aiming to contribute to preserving and improving health, with research concentrating on fatigue and active health. Through industry-university-government collaboration, the center develops health products and services, while making the latest scientific information available to society.

Nambu Yoichiro Institute of Theoretical and Experimental Physics (NITEP)

<http://www.sci.osaka-cu.ac.jp/phys/mathsci/NITEP/index.html>

As the only Japanese university where Dr. Nambu conducted research while teaching as a full-time professor, we founded a research institute under his name. Headed by Hiroshi Itoyama from the Graduate School of Science, the main research theme is “Quest of Universality and Emergence in Physics Led by Broken Symmetry.” The researchers of the institute will promote research both from the theoretical and experimental perspectives, rendering physics of elementary particles, atomic nuclei, spacetime, and condensed matter borderless, and forming the pillars of modern physics with “spontaneous symmetry breaking” as the central axis.

Our aim from now on is to facilitate a research environment that enables the promotion of advanced and international research activities and the cultivation of young researchers. We hope to form an international collaborative research base where leading researchers both inside Japan and from abroad can gather and work together.

Osaka City University Advanced Mathematical Institute (OCAMI)

http://www.sci.osaka-cu.ac.jp/OCAMI/index_e.html

OCAMI was initially established in 2003 within the Graduate School of Science following its selection for the 21st Century Center of Excellence Program under the theme “Constitution of Wide-Angle Mathematical Basis Focused on Knots.” Even after the program ended, OCAMI has continued with its research and educational projects in mathematics and mathematical science and serves as an international institute encouraging young people who are interested in this field. In 2019, OCAMI was authorized as a Joint Usage/Research Center by the Ministry of Education, Culture, Sports, Science and Technology of Japan (MEXT).

OCU Advanced Research Institute for Natural Science and Technology (OCARINA)

http://www.ocarina.osaka-cu.ac.jp/index_e.html

OCARINA was established as an interdisciplinary research institute consisting of selected members from faculties of Science, Engineering, and Human Life Science. The aim is to find solutions for environmental problems and global crises that the world is now facing, such as shortage of energy and water resources, food production and global warming with cooperation and assimilation of the accumulated knowledge of these faculty members. This also contributes to cultivate students tackling these problems.

Research Center for Urban Health and Sports (RCUHS)

<http://www.sports.osaka-cu.ac.jp/?language=en>

RCUHS works on interdisciplinary research in health and sports sciences in collaboration with associated administrative agencies and enterprises, to promote a healthy and active lifestyle in modern society. The center also offers lectures, sports practice, and applied experiment classes that contribute to improving students’ understanding of the physiological and psychological effects of human movement and sports activity.

Research Center for Artificial Photosynthesis (ReCAP)

<http://www.recap.osaka-cu.ac.jp>

To realize the artificial photosynthesis technologies required for producing solar fuel from CO₂, ReCAP was established in 2013 as a center of excellence for research and development based on collaboration between the industry and academia. In 2016, ReCAP was authorized as a Joint Usage/Research Center by the Ministry of Education, Culture, Sports, Science and Technology of Japan (MEXT). The center has provided financial and technical support for collaboration proposals related artificial photosynthesis from the research community. ReCAP aims to develop a CO₂ recycling society for next generation using the artificial photosynthesis technologies.

Urban Research Plaza (URP)

<http://www.ur-plaza.osaka-cu.ac.jp/en/>

Cities should ideally be places where new knowledge and urban culture are created through various encounters and discourses. URP, founded in April 2006, provides a platform for such endeavors with its unique structure and approach. URP has several satellite offices for studying urban problems on the scene. URP also has established international networks with various academic institutions and civic organizations in Shanghai, Yogyakarta, Bangkok, Hong Kong, Seoul, and Taipei. In addition, URP provides financial support for young researchers studying all over the world through its Research Fellow Program. Furthermore, in 2010, URP launched the international academic journal *City, Culture and Society (CCS)* published by Elsevier, a leading publisher, with editors working at prestigious universities including the City, University of London and the University of Zurich.

Faculty of Business/ Graduate School of Business

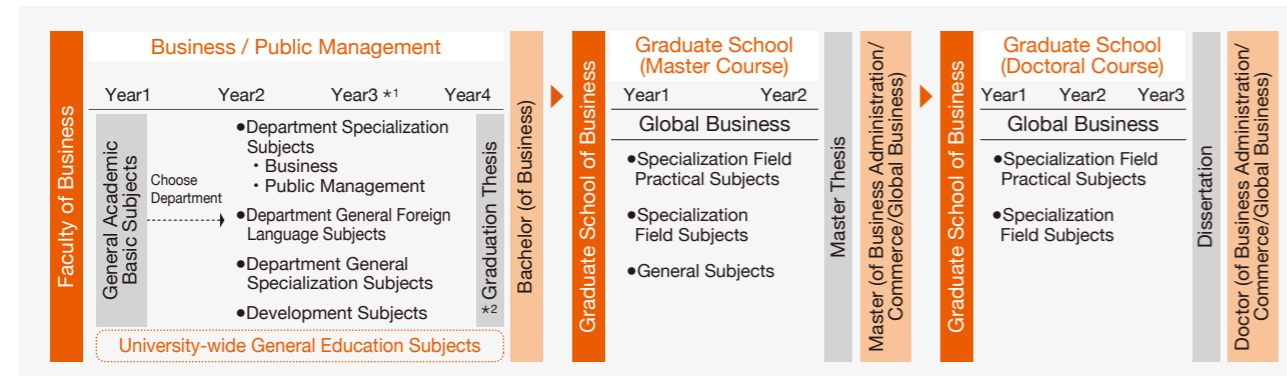

<http://www.bus.osaka-cu.ac.jp>

Seeking New Knowledge and Innovation for Global Business

■ Bachelor (of Business) ■ Master (of Business Administration) ■ Master (of Commerce) ■ Master (of Global Business)
■ Doctor (of Business Administration) ■ Doctor (of Commerce) ■ Doctor (of Global Business)

CURRICULUM

*1 : After completing the 3rd year it is possible to apply for the 5-year Undergraduate and Master Program (which makes it possible to obtain a Bachelor and Master degree in 5 years)
*2 : The graduation thesis is an elective subject.

Since the foundation in 1880, the Faculty of Business/ Graduate School of Business (GSB) and its predecessors have sent off thousands of excellent graduates into the world of business and research. The institution, focusing on both local and international business, has established its reputation as one of the most renowned business schools in Japan.

We place great importance on small grouped tutorials in our undergraduate programs. For the first and the second year students we have pro-seminar and theme-seminar, for the third and the fourth year students we provide specific field-seminar separately. Varieties of subjects are also provided from each course unit such as Management, Management Information, International Business, Industry and Urban City Management, Finance, Distribution, and Accounting.

In order to secure creativity and flexibility of our graduate programs, we organize our "Global Business Program" into a so-called GSB matrix, which consists of subject groups and research units.

Subject groups, as the first dimension of the GSB matrix, are composed of four subjects: Management, Accounting, Finance and Distribution, and Industry and Region. Each

subject provides both basic and advanced knowledge of the area. Students can choose any subject as their major or minor. In the second dimension of GSB matrix, there are five research units: Strategic Management, Management Information, International Business, Industry Creation, and Public and Environmental Management. Each of the research units is designed for the purpose of specialized and focused research. Students can make a variety of choices by selecting different subjects and units.

We have established a new "Asian Business Research Program" in the master's course since 2018. This program aims to nurture human resources who will work in Asian business and to develop international education and research of the Graduate School of Business.

Faculty of Economics/ Graduate School of Economics

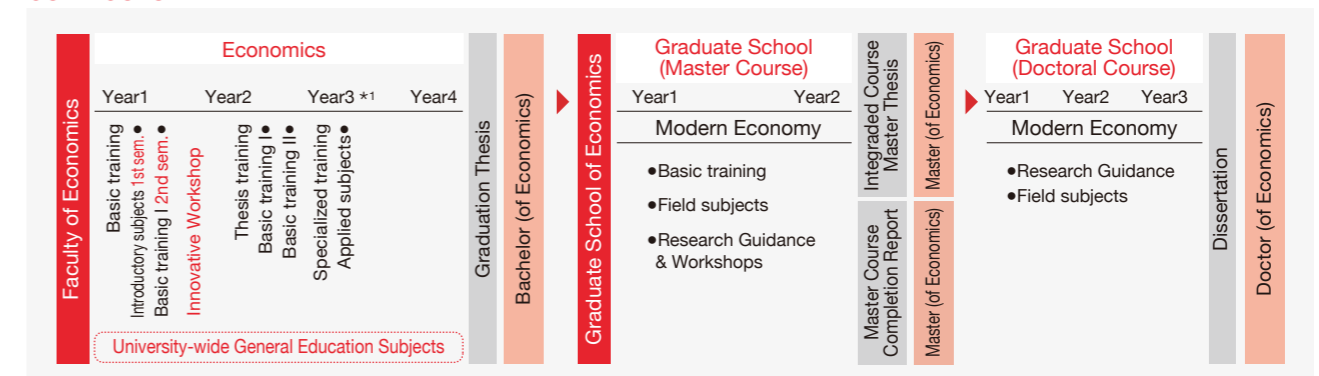

<http://www.econ.osaka-cu.ac.jp>

Shaping Students for Global Competition

■ Bachelor (of Economics) ■ Master (of Economics) ■ Doctor (of Economics)

CURRICULUM

*1 : Students with excellent study results may take the entrance exam for the master course during the 3rd year.

The Faculty of Economics features a wide range of courses and research specialties. Research areas include economic theory, quantitative research, economic history, political economy, labor, and welfare. Asian studies are a major strength, and some professors specialize in Europe and the European Union as well.

The curriculum is diverse but systematic. Students take a wide range of introductory courses during their first, then begin taking more specialized classes as second-year students. We have a large number of small classes that allow students to interact closely with professors.

Our two-year seminar classes are especially important. To ensure high educational standards, we limit the number of students in each seminar to ten. Professors guide the development of research skills of students during their third years, and then supervise the writing of graduation thesis.

We are steadily expanding our international program. We have expanded the number of classes taught in English, and we also actively engage in international academic exchange with foreign universities such as Jilin University in China and Chonnam National University in Korea and

facilitate joint research and exchange in education for both faculty members and students.

Finally, the Faculty of Economics serves as a gateway to excellent career opportunities. Our students are especially attractive to financial institutions, and have recently been hired by Nomura Securities, Sumitomo Mitsui Banking Corporation, and MUFJ Bank. Other Faculty graduates have recently been hired by Toyota, Panasonic, Komatsu, and Daiwa House. We have strengthened our alumni network and improved assistance to job-hunting students.

Faculty of Law/ Graduate School of Law

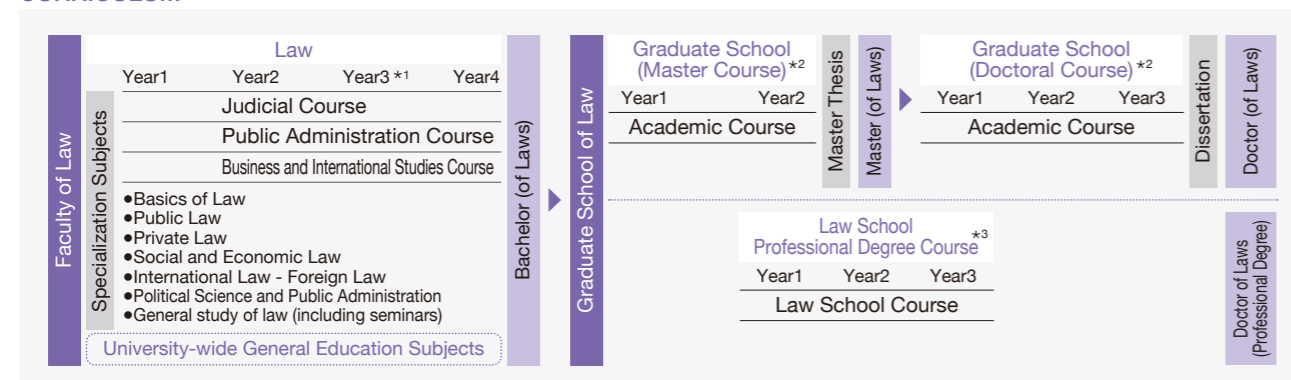

<http://www.law.osaka-cu.ac.jp>

Face-to-Face Communication with Professors

■ Bachelor (of Laws) ■ Master (of Laws) ■ Doctor (of Laws)

CURRICULUM

*1: Students with excellent study results may take the entrance exam for the master course during the 3rd year.

*2: Students with excellent study results may take part in a shortened Master Course program (standard 2 years). Doctoral students with excellent study results may shorten the doctoral program (standard 3 years).

*3: Students need to obtain credits over 3 years, but students that have been judged to have sufficient academic ability in certain subjects offered within the Law School may be allowed to finish the course in 2 years.

The purpose of the education in the Faculty of Law is twofold. First, students are given fundamental knowledge in various branches of social science. They are also given training for proficiency in foreign languages. Second, we ensure that all students acquire the basic skills needed for legal analysis. They additionally practice essay writing, oral presentations, discussions and negotiations. The Faculty of Law has three educational courses: Judicial, Public Administration, and Business & International Studies. The number of students is kept small to allow one-to-one communication with professors and other teaching staff members. The latest information technology as well as millions of books and periodicals are available at the University Media Center.

Our Graduate School of Law has two educational courses. One is for students who want to further their ability to analyze legal and political problems (Academic Course), and the other is for those who want to practice law in the future (Law School). In the Academic Course, students usually engage in research work on a specific

theme, and thereby enhance their skills in legal and political analysis.

The Law School course provides students with a higher level of knowledge and skills required for practicing lawyers. For this purpose, in addition to our many professors with long academic careers, we also have professors who practice law and provide on-the-job training at law offices.

Faculty/ Graduate School of Literature and Human Sciences

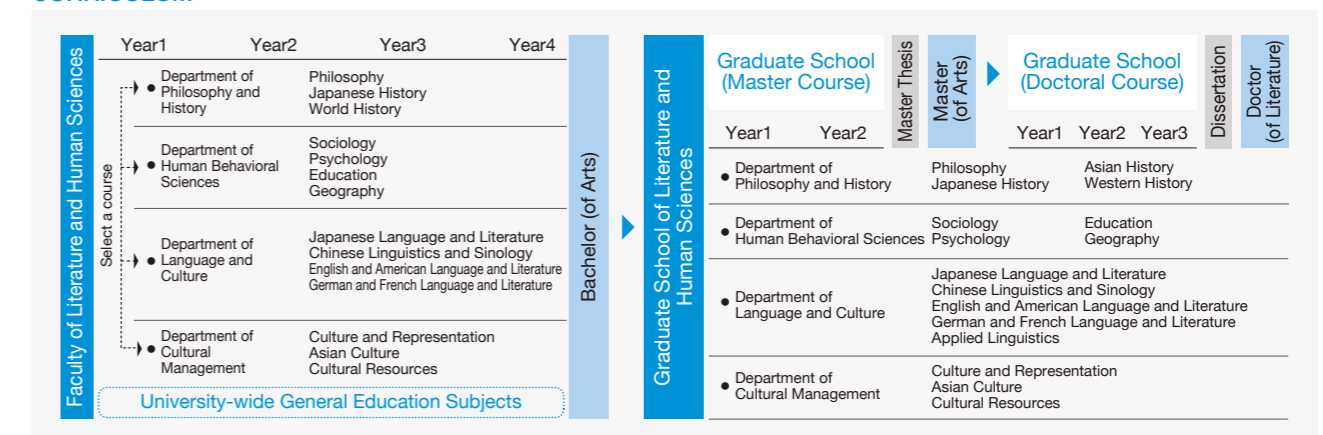

<http://www.lit.osaka-cu.ac.jp>

Adventures in Transformative Thinking

■ Bachelor (of Arts) ■ Master (of Arts) ■ Doctor (of Literature)

CURRICULUM

The common thread that runs throughout the Faculty of Literature and Human Sciences is the attitude of striving to reach a deep and comprehensive understanding of human beings and the culture that we have constructed. The fields of research covered by this Faculty spread through various matters relating to human beings - from the human being itself to cultural creations, including languages, ideologies, religions, literatures, histories and social systems.

The Faculty of Literature and Human Sciences consists of four departments: the Department of Philosophy and History, the Department of Human Behavioral Sciences, the Department of Language and Culture, and the Department of Cultural Management. Each course involves a small-class system, strictly adhering to a few or a carefully controlled number of students per class. Selecting from the diverse range of classes offered by each course, students can freely design their own curricula based on their interests and delve into the specialized or interdisciplinary topic of their choice.

The graduates of the Faculty find employment in the private sector, civil service and teaching profession, or go on to the graduate school for their Master/Doctor degree. Most of the doctoral graduates of our Faculty are engaged in careers in the fields of research and education at high-ranked academic institutions both in Japan and overseas.

Faculty of Science/ Graduate School of Science

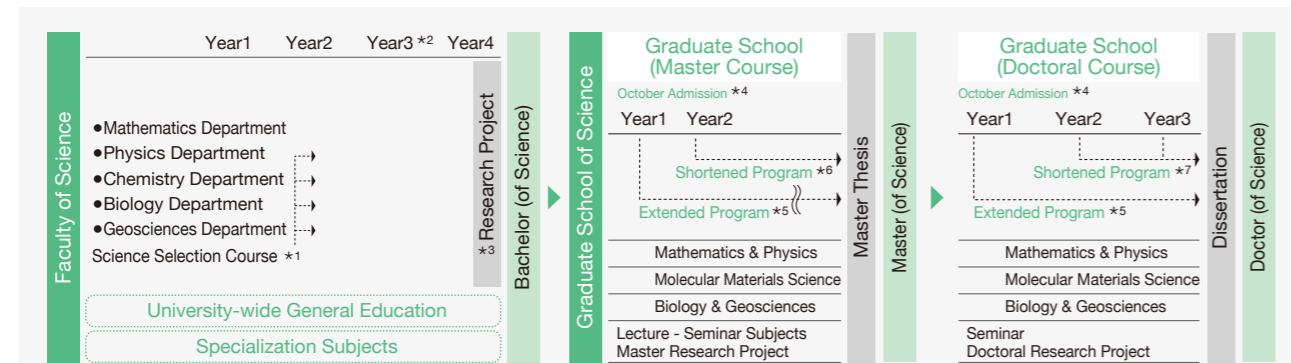

<http://www.sci.osaka-cu.ac.jp>

Enter Graduate School to Continue Advanced Studies

■ Bachelor (of Science) ■ Master (of Science) ■ Doctor (of Science)

CURRICULUM

*1 : Students who enter under the Science Selection Course can choose to enter the Physics Department, Chemistry Department, Biology Department or Geosciences Department at the end of the first year.
 *2 : Students with excellent study results may take the entrance exam for the master course during the 3rd year.
 *3 : 'Special Experiments-Special Theoretical Exercises' at the Physics Department.
 *4 : Regular Admission is in April, but October Admission is also possible (for international students at Master or Doctoral level).
 *5 : Upon certain conditions, students can extend their study program (to 4 years for the Master Course and 6 years for the Doctoral Course).
 *6 : Students with excellent study results may take part in a shortened Master Course program (standard 2 years). *7 : Doctoral students with excellent study results may shorten the doctoral program (standard 3 years).

The Faculty of Science established in 1949, now consists of five departments and the Botanical Gardens. Our faculty members play a leading part in a wide range of research fields and several groups have prominently high international reputations. On the basis of the research activities, high quality education is provided for both undergraduates and graduates.

The undergraduate course is designed systematically from basic to advanced subjects. The lectures are well linked with exercises; a variety of experimental trainings with high-level laboratory facilities and small group seminars are offered. The fourth year students are assigned to laboratories and pursue undergraduate researches under the supervision of a faculty member.

The graduate program combines creative, independent research with seminars and lectures. The dominant component is research. New graduate students usually complete their master thesis in two years and their doctoral thesis in three years. Our graduates go on to a variety of outstanding and rewarding positions, including jobs in academia, industry and national laboratories.

Osaka City University Botanical Gardens

The Botanical Gardens were established in 1950, as a research facility of the Faculty of Science and Engineering. Since then the Botanical Gardens have been collecting and preserving countless plants for the purpose of basic botanical research. The Botanical Gardens are not only used for research, but are open for anyone wishing to learn about nature.

Faculty of Engineering/ Graduate School of Engineering

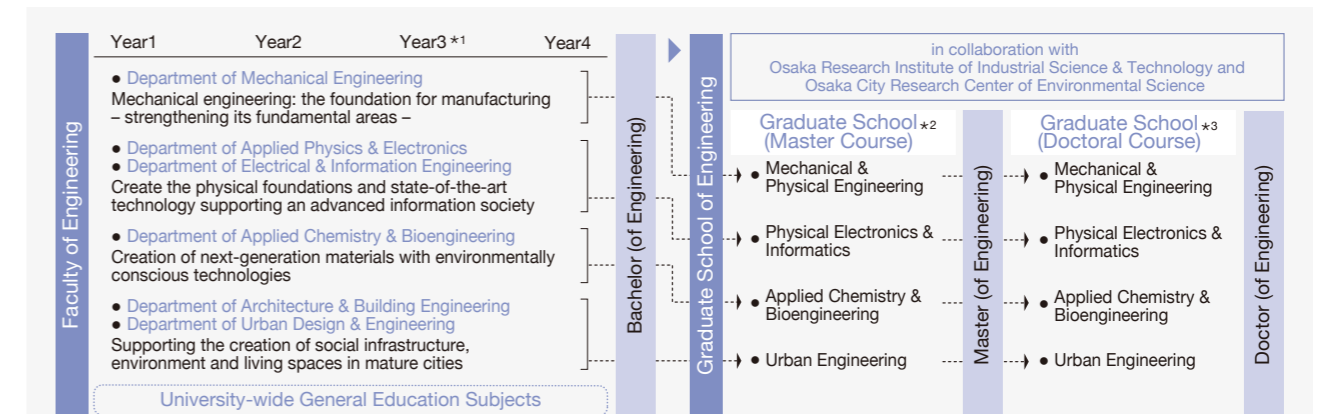

<http://www.eng.osaka-cu.ac.jp>

Contributing to Sustainable Development

■ Bachelor (of Engineering) ■ Master (of Engineering) ■ Doctor (of Engineering)

CURRICULUM

*1 : High-achieving undergraduate students may have a chance to take the entrance exam for the master course during the 3rd year.
 *2 : High-achieving graduate students may complete the master course program shorter than the standard period (2 years).
 *3 : High-achieving doctoral students may complete the doctoral course program shorter than the standard period (3 years).

Engineering is a creative application of knowledge of natural science and mathematics to fulfill various demands from human beings. Successful blooms of the engineering can be seen in numerous areas, for example, the emergence of information and communication technology (ICT) at the end of the last century has changed our lifestyle completely. Also, biotechnological inventions have successfully eradicated various types of diseases. We can share the fruits of the engineering with people all over the world.

Expectations for the engineering are still growing day by day to realize our dreams; however, a number of critical issues such as global warming, depletion of fossil fuels, remain unsolved. Engineers should address each issue with pursuing sustainable development as well as more comfortable, convenient and safe lives.

Faculty of engineering at OCU constitutes of six departments based on mathematics, physics, chemistry and biology. All the departments are oriented to address urban problems, because OCU locates in the middle of a big city. We welcome students eager to be really professional and sophisticated engineers or scientists addressing unsolved issues.

Faculty/ Graduate School of Medicine

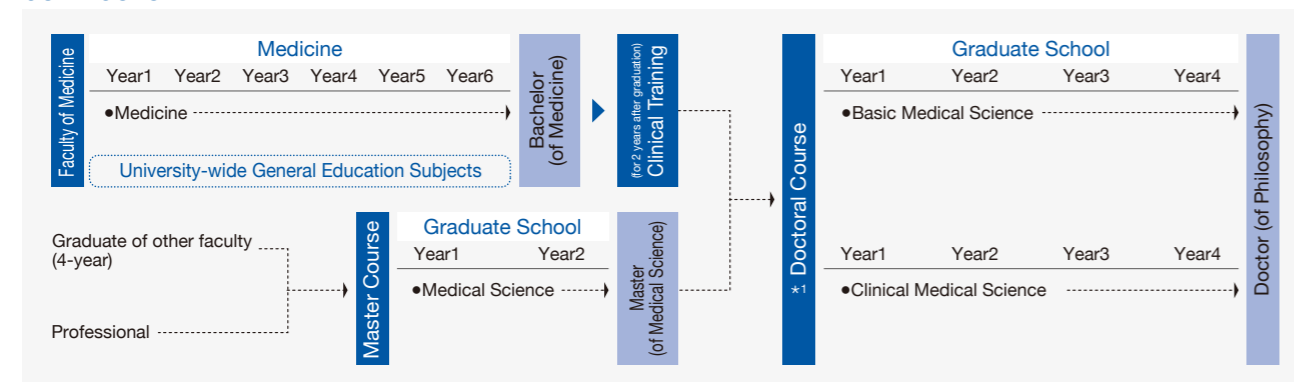

<http://www.med.osaka-cu.ac.jp>

As a Leading Medical Center in Osaka City

■ Bachelor (of Medicine) ■ Master (of Medical Science) ■ Doctor (of Philosophy)

CURRICULUM

*1 : <shortened curriculum> Students with excellent study results may complete the course in 3 or 3.5 years

The Osaka City University Faculty of Medicine was founded by Osaka City in 1944 to educate medical students to become doctors and practice medicine, with wisdom, blessing and bravery. The Faculty of Medicine, Graduate School and University Hospital are situated in the center of Osaka City (Abeno campus), just 20 minutes away from JR Osaka Station and 20 minutes from the main campus in Sugimoto.

We have more than 2,000 daily outpatients and 900 beds in the area of 87,000 m² of the University Hospital. The Faculty of Medicine, Graduate School and University Hospital play important roles in basic medical sciences and practice as a leading medical center in Osaka City.

The Graduate School is divided into two courses, the basic medical science and the clinical medicine courses. In addition to these regular 4-year courses, we have introduced a 2-year Master Course in medicine for nurses, pharmacists, clinical technicians, and other people who are interested in learning medical sciences and are working in the medical fields.

As a medical training institution, we intend to match the medical education global standard, to adapt to the qualitative and quantitative changes in society, to be patient-centered, and to develop quality medical providers with excellent communication skills and ethical values.

School of Nursing/ Graduate School of Nursing

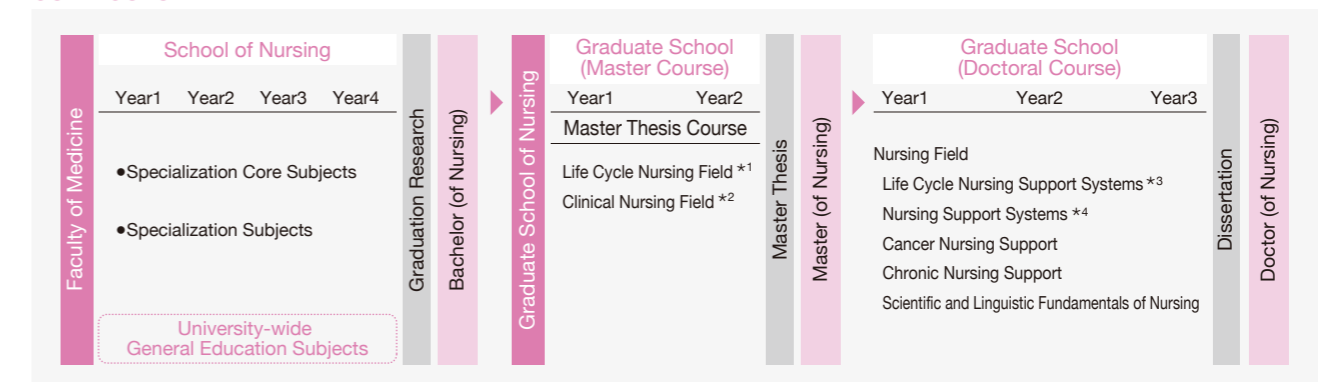

<http://www.nurs.osaka-cu.ac.jp>

To become a Health Care Practitioner with Liberal Spirits

■ Bachelor (of Nursing) ■ Master (of Nursing) ■ Doctor (of Nursing)

CURRICULUM

*1 : Fundamental Nursing, Public Health Nursing, Gerontological Health Nursing, Home Health Care Nursing

*2 : Scientific and Linguistic Fundamentals of Nursing (from academic year 2017) Cancer Nursing and Acute Nursing, Chronic Nursing, Psychiatric/Mental Health Nursing, Maternal Health Nursing, Child Health Care Nursing

*3 : Nursing Science, Public Health, Gerontology, Home Health Care *4 : Psychiatric/Mental Health, Maternal Health, Child Health Care

As a result of significant advances in both techniques and technologies in the field of medical science, Japan's health care environment has been experiencing rapid changes. These same advances have given Japan a lengthened average life span as well as a declining birth rate. The demand for nurses with capabilities to make precise observations and to provide exact assessment and skilled care increased not only in conventional health care institutions, but also in community and home health care setting.

Osaka City University Graduate School of Nursing/School of Nursing, opened especially to meet these needs. The school has developed a unique curriculum which is particularly useful in dealing with the complex problems our society is facing, such as creating a viable health care environment in an increasingly stressful modern society; a health care environment which takes into account the needs of elders as well as young people, focusing on the common thread of humanity and health that we all share. The need for keeping abreast of the latest developments in

international nursing is also emphasized as Japan moves to integrate further into the global health care community as health care leaders.

Faculty/ Graduate School of Human Life Science

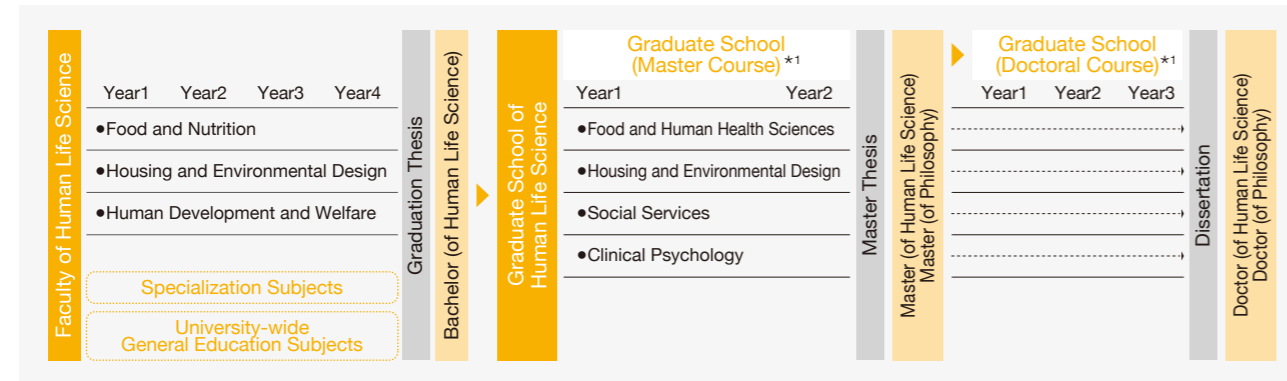

<http://www.life.osaka-cu.ac.jp>

With One Goal to Create the Best Quality of Life

- Bachelor (of Human Life Science) ■ Master (of Human Life Science) ■ Master (of Philosophy)
- Doctor (of Human Life Science) ■ Doctor (of Philosophy)

CURRICULUM

*1 : Upon conditions, students may be allowed to extend the study period. Not possible in each course.

The Graduate School of Human Life Science was established in 1975 and is one of the foremost institutes for research and education in the field of Human Life Science.

Human Life Science is obligated to show the direction of the road ahead to create a better quality of everyday life through investigations for improvement in health, psychology, well-being and our environment. With one goal to create the best quality of life, our four education and research courses and one comprehensive research unit are performing excellent research activities and providing students with a high degree of education in this academic field.

The Food and Human Health Sciences Course is to educate and study the fundamental science of nutrition, food safety, food science, applied and clinical nutrition. It consists of seven research groups: Molecular and Biochemical Nutrition, Food Science, Environmental Health Sciences, Nutritional Medicine, Public Health and Community Nutrition, Nutritional Education, and Clinical and Applied Nutrition.

The Housing and Environmental Design Course is to educate and study environmental engineering, design,

culture and housing planning. The education and study of this course focuses on contemporary issues associated with residential space for urban life and physical environment.

The Social Services Course is to educate and study social work and social policy towards the realization of the well-being of society.

The Clinical Psychology Course is to educate and study developmental, clinical psychology and family from the viewpoint of lifespan psychology towards the realization of human well-being.

Graduate School of Urban Management

<http://www.gsum.osaka-cu.ac.jp>

Toward the Education of Advanced Professionals and Practical Researchers

- Master Degree by studying evening/Saturday programs after working day-time
- Main class rooms located at very accessible site near Osaka Station (Umeda Satellite)

Regeneration and Revitalization of Cities through the Attainment of Urban Innovation and Sustainability

The Graduate School of Urban Management will support all leaders and professionals in search for the solutions of Urban Business/Public Policy problems.

Master Program of GSUM

Master Program of this new graduate school creates leaders, advanced professionals (from governmental/public institutions, private companies and non-profit organizations, etc.) who can solve urban management problems through the concepts of 'Innovation and sustainability' from the viewpoint of economics, management and policy sciences, regional studies and law/public administration study.

4 Courses of GSUM

- ① Urban Policy and Regional Economy Course
- ② Urban Governance Course
- ③ Urban Business Course
- ④ Innovation Management of Healthcare and Social Welfare Organizations Course

Doctoral Program of GSUM

(Notification has been submitted, to be opened in 2020.)
Doctoral Program of this new graduate school creates practical researchers (from governmental/public institutions, private companies and non-profit organizations, etc.) who can systematize, structuralize and modeling their study theme to get original conclusions and to write them in original papers. GSUM also supports the students to get the ability to study their own practical theme in an academic way and finally the doctoral degree.

Graduate School for Creative Cities

<http://www.gscs.osaka-cu.ac.jp>

Professionals in a mature urban society have increasingly hoped to acquire a high degree of knowledge related to their special fields and the ability to create knowledge solving problems. The Graduate School for Creative Cities offers a doctoral program that aims to train researchers and opinion leaders with practical and ability solving problems who will contribute to make our cities creative.

Graduate School for Creative Cities (GSCC) is no longer accepting new students.

Research Institutes and Facilities

Media Center

<http://www.media.osaka-cu.ac.jp>

With a collection of approximately 2.5 million books and access to 30,000 scientific journals, the Media Center is one of the largest university libraries in Japan. It offers a wide variety of facilities where students can study, practice presentations or simply relax, while also functioning as the hub of the university's information processing and networking.

University Hospital

<http://www.hosp.med.osaka-cu.ac.jp>

The University Hospital has 37 medical departments that handle an average of more than 2,000 patients each day, making it one of the largest general hospitals in Japan. Designated as 1) a Cancer Care District Liaison Hospital, 2) a Medical Center for Dementia and 3) an Emergency Medical and Critical Care Center, the hospital strives to provide high-quality health care for the Osaka region and to continually improve the care for its patients.

MedCity21

<http://medcity21.jp/>

MedCity 21, located in Osaka's new landmark, Abeno Harukas Building, is a comprehensive health examination facility consisting of a clinic and a research center. In the clinic section, high-precision examinations are provided by skilled staff members with advanced medical technology for preventive care for the early detection and treatment of diseases. By collecting biological specimens and health-related information from consenting patients, MedCity 21 has built one of the foremost biobanks in Japan. Development research on novel biomarkers and a comprehensive cohort study have been conducted in the research section.

Collaboration and Contribution Center for Community

<https://www.connect.osaka-cu.ac.jp/4c/>

Identifying and matching the needs of the local community, government, education and business with the university's educational and research resources, the Collaboration and Contribution Center for Community was opened in 2013. The Center contributes to community revitalization and cultural development through the creation of various encounters and exchanges between local people as "think tanks" to help respond to local challenges.

Botanical Gardens

<http://sci.osaka-cu.ac.jp/biol/botan/>

The OCU Botanical Gardens was established in 1950 to cultivate plants for botanical research. Eleven types of Japanese forest vegetation have been transplanted here, including about 450 species. Another unique feature is the "Fossil Forest" of *Metasequoia* and swamp cypress. The Botanical Gardens is also expanding as a center for the conservation of endangered plants. It is open to the public for educational and recreational purposes, too.

URA Center/ Osaka City University Incubator

<http://www.osaka-cu.ac.jp/ja/research/ura>

As a prime research hub for collaborative activities among government, industry and academia, the University Research Administration (URA) Center aims to strengthen the regional economy by stimulating industrial innovation. The OCU Incubator was established in 2002 for local entrepreneurs and enterprises pursuing new business ventures and/or new product development resulting from research projects conducted at Osaka City University.

Step-by-Step Admission Guide

Undergraduate Courses

June or November	Step 1 : Take the Examination for Japanese University Admission for International Students (EJU) The subjects you need to take and the scores you need to obtain differ per faculty.
October - December	Step 2 : Apply Obtain application form (from October) → Submit application (specified date in December)
February	Step 3 : Take the Osaka City University entrance exam
1 April	Enter Osaka City University (academic year: 1 April - 31 March)

Master Courses

Before July	Step 1 : Find an academic supervisor
June - July	Step 2 : Apply Obtain application form (from June) → Submit application (specified date in July)
August or September	Step 3 : Take the Osaka City University entrance exam
1 April	Enter Osaka City University (academic year: 1 April - 31 March) (October enrollment possible for Graduate School of Science. Application periods differ.)

Doctoral Courses

Before December	Step 1 : Find an academic supervisor
November-January	Step 2 : Apply Obtain application form (from November) → Submit application (specified date in January)
February	Step 3 : Take the Osaka City University entrance exam
1 April	Enter Osaka City University (academic year: 1 April - 31 March) (October enrollment possible for Graduate School of Science, Graduate School of Engineering and Graduate School of Medicine. Application periods differ.)

Research Students (6 months or 1 year period of study in preparation for entering into Graduate School)

Step 1 : Find an academic supervisor
Step 2 : Apply Application periods, selection and entry dates differ per Graduate School

How to find a supervisor

- see the list of researchers on our website: <https://research-soran17.osaka-cu.ac.jp/search?m=home&l=en>
- see the list of teaching staff on the website of each Graduate School
- see the list of research subjects in the 'Graduate Schools Outline' on the website
- see who teaches a specific course in the syllabus of each Graduate School

Contact a professor directly or via the Global Exchange Office and provide:

- your academic background (diplomas obtained or expected in the near future)
- the level you want to study at: research student/master/doctoral
- which Graduate School and which course you want to enter
- an indication of your Japanese language ability
- which professor you would like to ask to become your supervisor
- your study/research plan

Global Exchange Office : goto.ocu@ado.osaka-cu.ac.jp

NOTE : Classes at OCU are given in Japanese. However, some courses as well as academic supervision at graduate schools may be conducted in English.
For more details, see the official admission guidelines on <http://www.osaka-cu.ac.jp/ja/admissions> (Japanese only)

Academic Calendar 2019 - 2020

Commencement	Late March
First Semester	Apr. 1 – Sept. 30
Matriculation Date	April 5
Summer Vacation	Aug. 10 – Sept. 15
Second Semester	Oct. 1 – Mar. 31
Winter Vacation	Dec. 24 – Jan. 5
Spring Vacation	March 20 – 31

Housing

1. Residential facilities for international students

Osaka City University and other public organizations have a limited number of residential facilities for international and exchange students, including the Osaka City University International Residence. Nearly 90% of international students live in private apartments near Osaka City University.

		Number of Rooms	Eligibility	Residence Period	Monthly Fee	
					JPY	USD *
Osaka City University International Residence	Single Rooms	29	International students (New privately financed students get priority)	Max. 1 year	6,000	54
	Family Rooms	2 (Researchers get priority)	International students (New privately financed students get priority)	3 months ~ 1 year	16,300	145
Orion International residence	Single Rooms	85	Single Privately financed students	Max. 2 years	26,000	232
El Sereno	Single Rooms	3	Privately financed students (with student visa)	Min. years needed for graduation	18,100 ~ 47,200 (depends on your income)	161 ~ 421
	Family Rooms	1				
Uenoshiiba Woman's Dormitory	Single Rooms	93	Single female students	Min. years needed for graduation	5,500 (water charge is included)	49

* Converted based on the TTS rate on April 1, 2019

2. Private housing

3. Housing Guarantor System for International Students

When you rent an apartment in Japan, you will often be asked to have a joint-guarantor (rentai-hoshounin) who co-signs the lease to share liability with the lessee. This can be difficult for some students but it's hard to rent without a joint guarantor. Osaka City University can act as a joint-guarantor for international students (OCU undergraduate, graduate and research students) who are unable to find a guarantor by themselves.

Visa

Students need to obtain a visa before coming to Japan. OCU can apply to the Japanese Ministry of Justice for a Certificate of Eligibility for you to make the visa application process go more smoothly. After receiving the Certificate of Eligibility you can take it to the Japanese Embassy or Consulate in your country and apply for a visa.

Supplemental Japanese Language Class

This free supplemental class is offered once a week and is for enrolled international students who wish to further improve their Japanese.

Information for International Students

Tuition Fees (for privately financed international students, as of April 2019, amount may be subject to change)

Fees (all in Yen)		Application Fee		Admission Fee		Admission Fee for Osaka Citizens (1)		Annual Tuition Fee	
		JPY	USD*	JPY	USD*	JPY	USD*	JPY	USD*
Undergraduate	Degree Student	30,000	268	382,000	3,408	222,000	1,980	535,800	4,780
	Research Student	9,800	87	102,600	915	66,600	594	29,700 p/m	265 p/m
Graduate	Degree Student	30,000	268	382,000 (Law School:0)	3,408 (Law School:0)	222,000 (Law School:0)	1,980 (Law School:0)	535,800	4,780
	Research Student	9,800	87	102,600	915	66,600	594	29,700 p/m	265 p/m

* Converted based on the TTS rate on April 1, 2019

(1) To be eligible for the special fee for Osaka citizens or their children, you need to satisfy one of the following conditions :

- having lived in Osaka consecutively for at least 1 year prior to the day of university entrance
- having a parent in the same family register who has lived in Osaka consecutively for at least 1 year prior to the day of university entrance

NOTE : Payment of the tuition fee for degree students must be made in two installments for six month periods in May and October. Payment in smaller installments is not possible.
Payment of the tuition fee for research students is required per six months. Payment in smaller installments is not possible.

Financial Support and Scholarships for International Students

1. Tuition Fee Exemption

There are 30%, 50% or 100% exemptions of tuition fees available for international students with satisfactory study results but financial difficulties. You can apply after entering OCU.

		JPY	USD*
Standard tuition fee (per year)		535,800	4,780
50% exemption	First semester	133,950	1,195
	Second semester	133,950	1,195
30% exemption	First semester	187,530	1,673
	Second semester	187,530	1,673

* Converted based on the TTS rate on April 1, 2019

2. Scholarships

After enrollment you can apply for a number of scholarships for which you need a recommendation from OCU. You can apply for a recommendation in April (after you have been admitted to OCU) and you can then use the recommendation throughout the year to apply for the various scholarships.

For a list of available scholarships, amounts and conditions, please see the QR Code on the right

Cost of Living

Source: Lifestyle Survey of Privately Financed International Students 2017 (JASSO)

Cost of Living per month (Average Expenditure)

	Undergraduate	Master	Doctor	Research Students
JPY	148,000	132,000	134,000	127,000
USD*	1,320	1,178	1,195	1,133

* Converted based on the TTS rate on April 1, 2019

Per university type

	National	Public	Private
JPY	121,000	116,000	154,000
USD*	1,079	1,035	1,374

* Converted based on the TTS rate on April 1, 2019

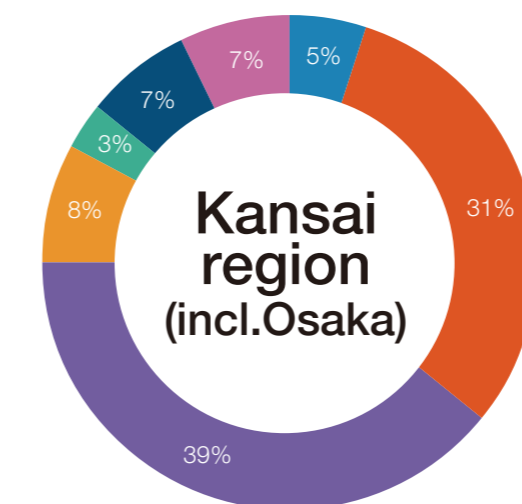

Per region

	Kanto region (incl. Tokyo)	Kansai region (incl. Osaka)
JPY	157,000	143,000
USD*	1,401	1,276

* Converted based on the TTS rate on April 1, 2019

Breakdown of monthly spending (Kansai region)

Commuting	5%
Food	31%
Rent	39%
Utility charges (electricity, gas and water)	8%
Insurance & Medical	3%
Hobby & Entertainment	7%
Miscellaneous	7%

Overseas Partner Institutions

Osaka City University has concluded various academic exchange agreements with universities and research institutes abroad. Under these agreements, a number of mutual exchange programs for both researchers and students have been established. The university expects to expand its international exchange through further agreements with other overseas institutions. (As of 1 April 2019)
